**Google Family Link issues**

We have been made aware of some issues with Edmodo and Google Classroom on tablets that have the Google Family Link app installed on them.

We have tried various ways of getting around the Google Classroom / Family Link fight, but we have not yet found a working solution. Maybe Google will start to look at the problem as more people report it. In the meantime, Google classroom can still be accessed via standard Windows, Apple or Chromebook devices and tablets not using the Family Link App.

Here is the Edmodo work around.

Sign up for a new Edmodo account by pressing the yellow *Sign Up* button in the top right-hand corner of the screen and select the 'I'm a student' option.

Complete the fields in the red box.

You will need to enter the class code at this point.

To get the correct class code, please email consult@whitehill.herts.sch.uk stating your child's name and class and we will send you the code.
